YUNYOUNG ROH

noyunyoung@naver.com | rrrohyy.github.io/rrrohyy-space/

linkedin.com/in/yunyoungroh | github.com/rrrohyy

Software engineer with 8+ years of experience in advertising backend systems, real-time data processing, and NLP-powered search at NAVER.

PROFESSIONAL EXPERIENCE

NAVER Corp. | Software Engineer Seongnam, South Korea • Jul 2018 – Present

Advertising Backend & Streaming Data Systems | 2024 – Present

- Migrated batch-based pageview and session-duration aggregation to a real-time streaming application using Kafka Streams.
- Worked on streaming data processing for advertising measurement and conversion tracking.
- Improved stability of APIs supporting high-volume advertisers.
- Extended user-tracking functionality for advertising data processing workflows.
- Maintained large-scale Kafka-based streaming pipelines for advertising conversion tracking.

Search / Natural Language Processing | 2018 – 2023

- Developed and maintained a knowledge-snippet extraction service that presents concise answers directly in NAVER Search results; built query targeting and document preprocessing workflows.
- Built a Clova-based broadcast Q&A prototype and an internal multilingual term-management tool supporting synonyms and hierarchical relationships.

EDUCATION

KAIST College of Business Seoul, South Korea • 2025 – Present

Master of Information Management (IMMS), Part-time Master's Program

University of Southern California, Marshall School of Business Los Angeles, CA • Fall 2026

MBA International Exchange Program | Graduate Exchange Student

University of Illinois Urbana-Champaign Urbana-Champaign, IL • Dec 2017

Bachelor of Science in Computer Engineering

Relevant Coursework: Digital Systems Laboratory, Computer System Engineering, Analog/Digital Signal Processing

TECHNICAL SKILLS

Languages & Low-level: C and C++, Python, Kotlin, JavaScript, SQL, x86 Assembly

Backend & Data: Kafka, Kafka Streams, PySpark, Hadoop, MapReduce, Elasticsearch, MySQL, RESTful APIs

ML, Web & Tools: PyTorch, Git, Linux, Android Studio, AngularJS, HTML5, CSS3

ADDITIONAL EXPERIENCE

EP Purification Inc. | Software & R&D Intern Champaign, IL • Jun 2017 – Jan 2018

Developed configurable software features for purification systems and rebuilt the company website.

Sentbe | Frontend Engineering Intern Seoul, South Korea • Jun – Aug 2016

Implemented and redesigned web interfaces using AngularJS, jQuery, and JavaScript.
